PROFESSIONAL SUMMARY

Frontend Engineer with 7+ years building fast, accessible, maintainable web applications in **React and TypeScript** with real ownership over frontend architecture and a shared design system used across **1000+ enterprise sites**. Experienced managing application state and data fetching (**React Query, Redux Toolkit, Zustand, Context API**), optimizing for Core Web Vitals and bundle size and collaborating on API contracts with backend engineers. Comfortable reviewing code and mentoring other frontend engineers, with strong written and verbal English communication from direct client and cross-functional collaboration.

SKILLS

- **Frontend:** React, TypeScript, Next.js, JavaScript (ES6+)
- **State & Data Fetching:** Zustand, Context API, GraphQL, REST API contracts, React Query (TanStack Query), Redux Toolkit
- **Architecture & Design Systems:** Component architecture, reusable UI libraries, Tailwind CSS, Material UI, Shadcn UI, Styled Components, Framer motion, Monorepo Architecture
- **Performance:** Core Web Vitals, bundle-size optimization, lazy loading, code splitting, SSR/SSG (Next.js)
- **Testing:** Jest, React Testing Library
- **Accessibility & Cross-Browser:** WCAG compliance, responsive design, verified across Chrome, Firefox, Safari, Edge
- **Collaboration:** Code reviews, mentoring, Agile/Scrum, Git, CI/CD (GitHub Actions)

WORK EXPERIENCE

Frontend Engineer | Kwanso, Lahore, Pakistan

Mar 2022 – Apr 2026

- Architected the frontend and shared component design system for **ChexPass and Chex365**, two production React applications serving 1000+ enterprise sites, converting UI/UX designs into responsive, accessible, cross-browser interfaces.
- Reduced new-feature development time by 30% by architecting a centralized, reusable UI component library (React, MUI, Tailwind, Yup) shared across 3 products via a monorepo, standardizing forms, layouts, and validation logic.
- Improved rendering performance and reduced unnecessary re-renders by migrating global state to Zustand and consolidating repeated GraphQL calls into reusable custom hooks, directly improving Core Web Vitals.
- Fixed a useEffect dependency issue causing the auth API to fire 3x on load reduced it to a single call, cutting redundant requests by **~66%**.
- Delivered a **Next.js 13 + TypeScript** marketing site with SSR, lazy-loaded viewport-aware video, and Cloudinary-optimized media to cut load time and improve SEO.
- Worked in a Docker-based environment for consistent development and deployment workflows.
- Reviewed code and mentored 2 developers on React and component architecture, raising code quality and review turnaround across the team.
- Collaborated on API contracts with backend engineers and participated in Agile ceremonies, code reviews, and debugging sessions alongside UI/UX designers.

Frontend Engineer | Kalon Couture, Remote — Hong Kong

Mar 2021 – Feb 2022

- Led frontend development of ShirtStylist, a production e-commerce React application, converting UI/UX wireframes into responsive, cross-device shopping experiences.
- Optimized REST API integration and checkout flows for speed and reliability, refactoring legacy UI architecture to improve component reusability and reduce reported UI defects.
- Delivered a fully accessible public site using HTML5, CSS3, and Tailwind CSS, achieving **WCAG accessibility** compliance on schedule.

Frontend UI Engineer | Maqware Solutions, Lahore, Pakistan

May 2019 – Feb 2021

- Developed reusable React.js UI components for a multi-service consultancy platform, implementing complex multi-step forms with React Hook Form, Redux, and REST API integration.
- Designed responsive, cross-browser layouts (HTML5, CSS3, Bootstrap, SASS, Tailwind) verified across Chrome, Firefox, Safari, and Edge.

Computer Science Lecturer | Central College, Lahore, Pakistan

Oct 2016 – Mar 2019

- Taught Intermediate Computer Science and communicated technical concepts clearly to students of varying skill levels.

KEY PROJECTS

ChexPass — Enterprise Visitor Management System | [Link](#)

- Real-time check-in tracking, security watchlist screening, multi-channel alerts, and operational dashboards for 1000+ sites. Stack: **React.js, TypeScript, Zustand, GraphQL, Material UI.**

Chex365 — Continuous Criminal Background Monitoring Platform | [Link](#)

- RBAC-controlled React application with real-time alerts, infinite scroll, and server-side pagination across large datasets with zero UI degradation.

Caba Operator — Embeddable Widget Platform + Admin Panel | [Link](#)

- White-label embeddable widget system with a self-serve admin panel; companion Next.js 13 + TypeScript marketing page using SSR and lazy-loaded media.

EDUCATION

Bachelor of Business and IT (Hons), IT Specialization — 2012 – 2016

University of the Punjab, Lahore, Pakistan

CONTINUOUS LEARNING

- Full-Stack Next.js 16 Development (JavaScript Mastery) — Next.js 16, TypeScript, NextAuth, MongoDB, Shadcn UI, React Hook Form. Completed 2026.
