

MUHAMMAD AWAIS

Frontend Developer | React.js | Redux | Reast APIs

Muhammadawais8091@gmail.com • +92 323 4735429 • [linkedin.com/in/hafiz-muhammad-awais](https://www.linkedin.com/in/hafiz-muhammad-awais) • Lahore, Pakistan

PROFESSIONAL SUMMARY

Frontend Developer with 7+ years building production web applications with React, JavaScript (ES6+), Redux/Context API, and REST API integration including full ownership of the frontend for SaaS platforms used across 50+ enterprise sites. Deep experience with TypeScript, Zustand and design-system-driven UI (Tailwind CSS), with a track record of cutting feature development time through reusable component libraries, mentoring developers, and building with AI-assisted tools (Cursor) as a daily workflow habit.

SKILLS

- **Frontend:** React, TypeScript, Next.js, Vite, JavaScript (ES6+)
- **State & Data:** Zustand, Redux Toolkit, Context API, GraphQL, REST API integration
- **UI & Design Systems:** Tailwind CSS, Material UI, Shadcn UI, Styled Components, Framer Motion, component library design
- **Testing:** Jest, React Testing Library (comfortable picking up Vitest/Playwright)
- **Cloud & Tooling:** AWS (ECS Fargate, S3, CloudFront), Docker, CI/CD (GitHub Actions), Git, Cursor (AI-assisted development)
- **Backend :** Python, FastAPI, SQLAlchemy

WORK EXPERIENCE

Frontend Engineer | Kwanso, Lahore, Pakistan

Apr 2022 – Continue

- Architected the frontend for ChexPass and Chex365 using React.js, JavaScript, and REST/GraphQL APIs, serving 50+ enterprise sites.
- Cut new-feature development time by 30% by building a centralized UI component library (MUI, Tailwind, Yup) that standardized forms and layouts across both platforms.
- Eliminated unnecessary re-renders and migrated global state to Zustand, consolidating repeated GraphQL calls into reusable custom hooks to improve runtime performance at scale.
- Mentored 2 developers and enforced a reusable component architecture, raising code quality and review turnaround across the team.
- Partnered directly with product managers, backend engineers, and designers in a two-week Agile cadence to ship cross-functional features fast.

Frontend Engineer | Kalon Couture, Remote — Hong Kong

Mar 2021 – Feb 2022

- Led frontend development of ShirtStylist, a production e-commerce platform, using React.js and Redux, delivering a fully responsive, cross-device shopping and checkout experience.
- Rebuilt the platform's UI architecture and REST API integration layer, resolving the cross-device rendering and data-handling defects that had been the main source of customer-facing bug reports.
- Delivered a WCAG-accessible public site for a Youth Council initiative using HTML5, CSS3, and Tailwind CSS, hitting pixel-accurate design fidelity on a fixed deadline.

Frontend UI Engineer | Maqware Solutions, Lahore, Pakistan

May 2019 – Feb 2021

- Built the core React UI for a multi-step consumer application workflow, replacing static forms with dynamic React components wired to REST APIs.
- Owned responsive, cross-browser layout work (HTML5, CSS3, Bootstrap, SASS, Tailwind) verified across Chrome, Firefox, Safari, and Edge.

Computer Science Lecturer | Central College, Lahore, Pakistan

Oct 2016 – Mar 2019

- Taught Intermediate Computer Science, conducted practical lab sessions, assessed student performance, and promoted digital literacy in accordance with the curriculum.

KEY PROJECTS

ChexPass — Enterprise Visitor Management System

- Designed the notification architecture: configurable templates with live preview, letting non-technical ops teams manage multi-channel alerts without engineering involvement.
- Owned the Chargebee + Stripe billing integration end-to-end — plan selection, upgrades, invoicing, and webhook handling.

Chex365 — Continuous Criminal Background Monitoring Platform

- Designed a flexible RBAC system supporting custom roles/permissions, and an infinite-scroll notification feed with server-side pagination that held up under large datasets with zero UI degradation.

Caba Operator — Embeddable Widget Platform + Admin Panel

- Designed the widget/admin-panel split so non-technical clients could fully re-brand and reconfigure embedded flows without developer involvement.
- Built the companion Next.js 13 + TypeScript marketing funnel (SSR, Cloudinary-optimized, viewport-aware video) to convert traffic into scheduled demos.

EDUCATION

Bachelor of Business and IT (Hons), IT Specialization — 2012 – 2016

University of the Punjab, Lahore, Pakistan

CONTINUOUS LEARNING

Full-Stack Next.js 16 Development (JavaScript Mastery) — Next.js 16, TypeScript, NextAuth, MongoDB, ShadCN UI, React Hook Form. Completed 2026.
